

MICRO-MINI HYdraulics, Inc.

5/86

MICRO-MINI HYdraulics offers a pressure gauge with superior performance and extra long life. The GG Series Glycerin-filled Gauges excel in applications where continuing changes of pressure or vibration can be found. High performance and 1.6% accuracy are attainable due to high quality construction of the MICRO-MINI Gauges. The entire gauge mechanism is fixed in a dust and watertight case. The glycerin filling effects an attenuation of vibration and guarantees a long life of bourdon tube and movement by its lubricating and corrosive prevention characteristics.

ORDERING INFORMATION

GD	-	IC	-	2.5	-	4B
Series Type		Range (PSI/BAR)		Dia.		Mount
GD = Dry Type GG = Glycerin-filled		IC = 0-100/7 2C = 0-200/14 6C = 0-600/42 1M = 0-1000/70 1.5M = 0-1500/100 2M = 0-2000/140 3M = 0-3000/210 5M = 0-5000/350 6M = 0-6000/420 10M = 0-10,000/700		2.5" (63mm)		4B-1/4 Bot.
